Insights:

- *Tier 3 cities contribute the highest sales, indicating strong untapped demand in lower tier markets--expansion should prioritize similar geographies.*
- *Fresh produce (Fruits and vegetables) drives the highest sales, suggesting frequent purchase behavior-- opportunity to bundle and increase basket size.*
- *Medium-sized outlets drive the highest order volume, while Supermarket type 1 leads in revenue--indicating higher efficiency and scalability in this format.*

So What Should Blinkit Do?

Growth is driven by Tier 3 expansion and high- frequency categories, with opportunity to scale efficient formats.

- ***Expand presence in Tier 3 cities with medium-sized outlets.***
- ***Strengthen Fresh produce supply chain to support high- frequency demand and reduce stock-outs.***
- ***Scale Supermarket type 1 model for higher revenue efficiency.***
- ***Introduce category- based bundling (fruits+ dairy) or (fruits + households).***
- ***Expand low- fat product assortment to capture health- conscious customer segment.***
